

AWK

Aho, Weinberger, Kernighan

Arwn [arwn@42.us.org](mailto:arwn@42.us.org)

*Summary: awk AWK awk awk awk.*

# Contents

<b>I</b>	<b>Foreword</b>	<b>2</b>
<b>II</b>	<b>Instructions</b>	<b>3</b>
<b>III</b>	<b>Submission</b>	<b>4</b>

# Chapter I

## Foreword

There is no foreword.  
Read the manpage.

- [the manpage](#)

# Chapter II

## Instructions

- You will turn in a file named solution.awk.
- Norminette runs the following command to grade you

```
% awk -F, -f solution.awk avocado.csv > user && diff user system
%
```

- Your project must *\*not\** be written in accordance with the Norm.

Given the file ‘avocado.csv’, write an awk script that will output every entry where avocados cost less than a dollar on average followed by the average of that set.

example:

```
% cat avocado.csv
Price, Region
0, 1.33, Albany
1, 1.35, Albany
2, 0.93, Albany
% awk -F, -f solution.awk avocado.csv
2, 0.93, Albany
0.93
%
```

# Chapter III

## Submission

Submit `solution.awk` in the root of your directory. Only the work on your repository will be graded. “moulinette” will grade your work.
